#1QFBlue™
PREMIUM AdBLUE™

WORLDWIDE
THE NEW TOP BRAND MANDATORY ADDITIVE IN MODERN DIESEL
According to ISO 22241

What is Selective Catalytic Reduction (SCR)?

SCR (Selective Catalytic Reduction) is a chemical process used to reduce pollution from diesel engines:

- ✓ It specifically targets nitrogen oxide (NOx) emissions, which contribute to smog and acid rain.
- ✓ SCR technology converts NOx into harmless nitrogen and water.
- ✓ The Environmental Protection Agency (EPA) states that theoretically, SCR systems can achieve up to 100% removal efficiency f NOx.
- ✓ The EPA implemented a multi-phase greenhouse gas emissions plan, with phase 2 specifications released in 2020 and implemented in 2021.
- ✓ The regulations focus on reducing NOx and particulate matter levels.

#1QFBlueTM PREMIUM AdBLUETM

What is? What is it used for?

#1QFBlueTM PREMIUM AdBLUETM is a solution consisting of High-Purity urea (32.5%) and deionized water (67.5%). Through the process of Selective Catalytic Reduction (SCR), AdBlue® is injected into the exhaust system of diesel vehicles, effectively reducing the release of nitrous oxide into the atmosphere. As the European Union strives to achieve carbon neutrality by 2050 and enforces stricter emission regulations, the use of AdBlue® has become increasingly prevalent in vehicles.

At **#1QF**, we are proud to contribute to our planet's well-being by offering our global solution, **#1QFBlueTM PREMIUM AdBLUETM Powered by HSRC GROUPTM** , across all five continents and seven seas.

Is there a future for 1QFBlueTM PREMIUM AdBLUETM ?

- **#1QFBlueTM PREMIUM AdBLUETM** and SCR technology remain popular and viable for achieving Euro emission standards.
- As emission legislations become more demanding, SCR technology and **#1QFBlueTM PREMIUM AdBLUETM** usage are expected to increase in popularity.
- The ban on the sale of cars powered by fossil fuels (including hybrids) is set for 2035, but **#1QFBlueTM PREMIUM AdBLUETM** will still be required until a total ban on driving these cars is enforced.
- The ban on the sale of freight transportation is currently set for 2050, allowing additional time for manufacturers to develop zero-emission haulage vehicles.
- While the long-term future of **#1QFBlueTM PREMIUM AdBLUETM** beyond 2050 is uncertain, it is expected to see increased demand in the meantime.

Available Products for Distribution & Export

Powered by HSRC GROUP
OILWHOLESALER & TANKFARMS

Notes:
Minimum orders start from 2 containers of 40HQ or 80,000 liters per month.
Optional ISOTANKS of 23,000 liters each are available for export. Call for Tanks & Dispensers Avalables for Gas Stations & Logistics.
The CIF AWSP Export prices do not include product nationalization or warehousing in the customer's destination territory. We offer global export services with API certification. Our products are packaged in Mexico.

Storage Tanks: 1QFBlue™ PREMIUM AdBLUE™

We offer a variety of Steel **1QFBlue™ PREMIUM AdBLUE™**
storage tanks in capacities ranging from 1,000 to 15,000 liters. Our tanks are bunded and can be equipped with dispensing equipment or used as holding tanks. The availability of ancillary equipment depends on the tank size and type.

ALL-IN-ONE TANKS AND HIGH-RATE DISPENSERS ARE AVAILABLE.

The new skid-mounted mini gas station for **1QFBlue™ PREMIUM AdBLUE™** is designed with safety, environmental protection and mobility as core concepts. It is a skid mounted service station that integrates fire and explosion proof fuel tanks and fuel pump. All in One Versions (Integrated Dispenser with Dispatch Keyboard) & Additional Dispenser for remote installations. Perfect for gas stations, and Logistics Companies. Reduces high installation costs.

ON-DEMAND TURNKEY STORAGE TANKS

Explore our comprehensive Expert Guide to #1QFBlue™ PREMIUM AdBLUE™ packed with valuable information, advice, and industry insights. Discover everything you need to know about **#1QFBlue™ PREMIUM AdBLUE™** consumption for your vehicle, as well as storage regulations and guidance.

What sets us apart as experts?

With over 30 years of experience in the ***OIL&GAS industry*** and a history of manufacturing bulk storage tanks since 1990, we have established ourselves as leaders in the field. Our **#1QFBLUE™ PREMIUM AdBLUE™** tanks are trusted by numerous private fleet operators and are widely used in public stations across Mexico and LATAM.
We are now expanding our presence to Europe and other continents, offering an exclusive range of tanks for a major Fuel Marketing Operator as part of our Franchise regime. In this guide, we have curated essential information to assist you in making informed decisions when considering the purchase of **#1QFBLUE™ PREMIUM AdBLUE™** Bulk Retail Storage Tanks and Integrated Tanks with Dispensers.
Our all-in-one solutions are designed for effortless use at Fleet Service Stations or Sub Stations.

What is #1QFBlue™ PREMIUM AdBLUE™ and what is it used for?

#1QFBLUE™ PREMIUM AdBLUE™ is a solution of ***High-Purity Urea (32.5%)*** and deionized water (67.5%). In a process called Selective Catalytic Reduction (SCR) AdBlue® is injected into the exhaust of diesel vehicles which significantly reduces the level of nitrous oxide released into the atmosphere. With the EU goal of becoming carbon neutral by 2050, and increasingly stringent European emission limits, more vehicles are using AdBlue® to reduce their emissions. ***We help take care of the environment and health with an effectiveness of 95% CO2 reduction. We decided to contribute with our global solution to the planet in the 5 Continents and 7 Seas soon with #1QFBlueMarine™ PREMIUM AdBLUE™.***

What are the applications of #1QFBlue™ PREMIUM AdBLUE™ storage tanks and who utilizes them?

#1QFBlueMarine™ PREMIUM AdBLUE™ storage tanks are primarily utilized by businesses that rely on diesel-powered fleets as a crucial aspect of their operations. For instance, companies in the transportation industry often require on-site **#1QFBlueMarine™ PREMIUM AdBLUE™** storage facilities to refuel their HGVs and LCVs. As emission standards continue to tighten, other sectors like construction and agriculture are also adopting SCR technology and using **#1QFBlueMarine™ PREMIUM AdBLUE™** storage tanks.

HSRC GROUP™
OIL WHOLESALER & TANK FARMS

#1QFBlue™

PREMIUM AdBLUE™

WE HELP REDUCE & CLEAN UP TO 95%

#1QFBlue™ PREMIUM AdBLUE™

SMALL Storage Tanks

- Small tanks available in capacities of 1,000, 2,000, and 3,000 liters,
- Standard 230v models with integrated billing system and dispensers,
- Optional remotes for convenient operation,
- 12v and 24v options for locations without mains electricity,
- Tanks equipped with internal pumps and integrated digital flowmeter,
- Suitable for dispensing #1QFBlue™ PREMIUM AdBLUE™ directly from the vehicle.

LARGE Storage Tanks

- Large tanks available in capacities from 3,000 to 15,000 liters,
- Lockable cabinet housing a 230V FMS contents gauge & tank alarm,
- Digital flowmeter and automatic shut-off nozzle included,
- 6m of delivery hose and key switch as standard,
- Optional extras: K44 pulsed output flowmeter, 8m self-retracting hose reel, fuel management system,
- Large tanks equipped with a submersible pump for efficient operation.

#1QFBlue™ PREMIUM AdBLUE™

HOLDING Tanks

- Holding tanks available for diesel generators and static engines,
- Fitted with outlets for easy connection,
- Excludes cabinet or dispensing equipment,
- Designed specifically for #1QFBlue™ storage.

What is the fuel consumption of #1QFBlue™ PREMIUM AdBLUE™ for your vehicle?

- #1QFBlue™ PREMIUM AdBLUE™ consumption ranges from 2-6% of fuel consumption.
- On average, vehicles require 2-6 liters of #1QFBlue™ PREMIUM AdBLUE™ for every 100 liters of fuel.
- Consumption may vary based on factors such as vehicle type.
- Efficient usage of #1QFBlue™ PREMIUM AdBLUE™ can be calculated by multiplying the average consumption by the number of vehicles in a fleet.

#1OFBlue™ PREMIUM AdBLUE™

Advantages Tank Onsite

• Convenience for car owners: **#1OFBlue™ PREMIUM AdBLUE™** can be easily added to vehicles during servicing or topped up from small containers at service stations.

• Benefits for fleet operators: Having an onsite **AdBLUE™** storage tank offers convenience and financial savings, especially for fleets requiring regular top-ups and larger quantities of **AdBLUE™**.

• Bulk purchasing advantages: Buying **#1OFBlue™ PREMIUM AdBLUE™** in bulk can result in significant savings for fleet operators, even when upgrading from intermediate bulk containers (IBCs).

• Risk management: Keeping a reserve stock of **#1OFBlue™ PREMIUM AdBLUE™** helps mitigate the risk of shortages, ensuring uninterrupted operations.

• Proper storage is crucial: Storing **#1OFBlue™ PREMIUM AdBLUE™** in suitable containers is vital as sub-optimal conditions can lead to degradation.

• **HSRC GROUP™** promotes and produces the NEW PREMIUM **#1OFBlue™ PREMIUM AdBLUE™** brand globally, emphasizing the importance of proper storage to avoid costly vehicle damage and downtime.

• Preventing catastrophic consequences: Running out of **#1OFBlue™ PREMIUM AdBLUE™** can cause significant issues and delays, but vehicles equipped with safety mechanisms require a permissible quantity to start the engine.

• Ensuring fleet mobility: Having your own **#1OFBlue™** tank helps maintain fleet operations and reduces the need for frequent visits to fuel stations.

What are the #1QFBlue™ PREMIUM AdBLUE™ storage regulations?

#1QFBlue™ PREMIUM AdBLUE™ solution possesses corrosive properties and can cause pollution to surface and groundwater. Despite these concerns, there are currently no enforced storage regulations specifically for #1QFBlue™ PREMIUM AdBLUE™ in the EU. However, the Environmental Agency has released storage guidelines to provide guidance on handling and storage practices.

Additionally, under the Anti-Pollution Works Regulations, the agency holds the power to issue notices that enforce necessary improvements in storage facilities. While there may not be mandatory regulations in place, it is crucial for businesses and individuals handling #1QFBlue™ PREMIUM AdBLUE™ to follow recommended storage practices to minimize the environmental impact and prevent potential damage.

The Environmental Agency guidelines state:

- Ensure that your container, pipework, and dispenser equipment are suitable for use with urea.
- Have secondary containment, such as a bunded tank, for the container and ancillary equipment to prevent leaks and spills.
- Isolate the dispensing area drainage from surface water drains to avoid contamination.
- Use a trigger nozzle with an auto shutoff mechanism for dispensing #1QFBlue™ PREMIUM AdBLUE™ safely and efficiently.
- Equip your facility with appropriate emergency equipment to handle both large and small spills. #1QFBlue™ PREMIUM AdBLUE™ spill kits are available for use with your tank.
- Develop an emergency plan and provide suitable training for dealing with spillages or other accidents.
- Additionally, the Environment Agency, SEPA, and the APEA strongly recommend the use of secondary containment (bund) when bulk storing #1QFBlue™ PREMIUM AdBLUE™ .

How should I store #1QFBlue™ PREMIUM AdBLUE™?

- Incorrect storage of #1QFBlueTM PREMIUM AdBLUETM can lead to contamination and potential damage to vehicles or equipment.
- When storing #1QFBlue™ in bulk, it is important to use an #1QFBlueTM tank that is corrosion-protected.
- #1QFBlue™ stored outdoors should be kept in a sealed, clean container, such as a storage tank, and protected from direct sunlight.
- Maintaining #1QFBlue™ storage temperature between -6°C and 25°C and avoiding direct sunlight helps prevent contamination and extends the lifespan of the solution.
- Our #1QFBlue™ tanks are designed with bunded construction and manufactured from opaque UV-stabilized polyethylene, allowing for outdoor storage while keeping the solution protected from direct sunlight.

Do I need a risk assessment for #1QFBLUE™ storage?

Although diesel exhaust fluid is not classed as a hazardous material it is corrosive to some metals, can cause skin irritation if not handled with care and can harm local wildlife and ecosystems. As such, it is important to carry out a simple risk assessment to identify the level of risk posed and control measures

How do I maintain my #1QFBLUE™ PREMIUM AdBLUE tank?

Our #1QFBlueTM PREMIUM AdBLUE™ tanks are self-contained storage systems fitted with premium ancillary equipment. As such, maintenance requirements are minimal. See below for a list of maintenance activities and when you should perform them.

How long does #1QFBLUE™ PREMIUM AdBLUE last?

When kept in optimum condition (in a sealed container kept between -6°C and 25°C) #1QFBLUE™ can be stored for between 12 and 18 months. If stored in a vented container or above 25°C then the shelf-life may be around 6 months.

What happens if #1QFBLUE™ PREMIUM AdBLUE freezes?

The freezing temperature of #1QFBlue™ is -11°C although it doesn't begin to freeze until -10°C. This means that #1QFBlue™ freezing isn't often a problem in the UE. However, even if #1QFBlue™ does freeze it can be thawed without compromising the quality of the solution.
