aquamatch®
TURNING YOUR WATER INTO BENEFIT

JOINT COMPANY PROFILE

Sustainable Water Solutions for Colombia

SWRO Desalination Projects

International Expertise.
Regional Strength.
A Sustainable Future.

Prepared for Colombia SWRO opportunities

A Complementary Partnership for Colombia

Combining desalination technology with regional project capability

1989
AQUAMATCH established

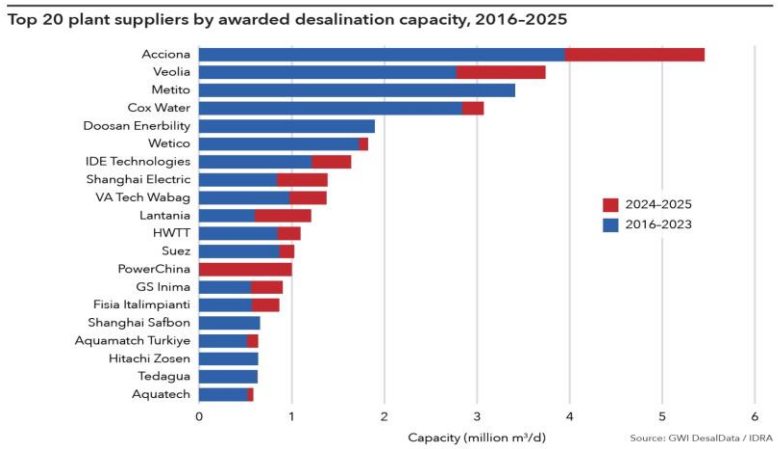

33+
HSRC Group years of O&G field experience

>350,000 m³/day
AQUAMATCH desalination capacity

Colombia
HSRC operational presence

AQUAMATCH

Advanced water treatment and desalination engineering, manufacturing, turnkey delivery and after-sales support.

HSRC GROUP

Regional infrastructure and energy project experience, with offices and operations in Colombia and Panama.

Together, the two companies bring technology, execution capability and regional reach to Colombia's SWRO market.

AQUAMATCH | Water & Desalination Expertise

A global water technology company focused on engineering, manufacturing, contracting and after-sales maintenance.

200+	4	45	16	>350,000 m³/day
Employees	Continents	Countries	Dealers / local offices	Desalination installed capacity

Core expertise

Desalination, drinking water, wastewater reuse and industrial water treatment.

Turnkey capability

Engineering, customized design, manufacturing, installation, commissioning, automation and after-sales support.

HSRC GROUP™ | Regional & Project Capability

International operations with an established presence in Colombia

1990	33+	177+	5
Established	Years O&G field experience	Certified global agents	Continents

- **Colombia footprint**

  Offices and operations in Medellín, Bogotá, Barranquilla and Cartagena, including the Caribbean Coast.

- **Project structuring**

  Experience in structuring infrastructure and energy projects within Colombian and Latin American markets.

Regional reach • Project development • Infrastructure & energy experience

Why HSRC GROUP™ & AQUAMATCH?

Two complementary capabilities aligned around project delivery

AQUAMATCH

- **SWRO technology**
  High-efficiency seawater desalination systems
- **Engineering & EPC**
  Integrated design, manufacturing and turnkey delivery
- **Process expertise**
  Water treatment and desalination applications
- **After-sales**
  Long-term technical support

HSRC GROUP™

- **Colombia presence**
  Offices and operations across key Colombian cities
- **Regional execution**
  Latin America and Caribbean market experience
- **Project structuring**
  Infrastructure and energy project capability
- **Local reach**
  Regional network supporting project development

Advanced SWRO & Modular Desalination

High-efficiency systems designed for flexibility, scalability and reliable performance

- **Seawater Reverse Osmosis**

  Proven SWRO process expertise supported by a broad international project portfolio.

- **High efficiency**

  Optimized system design focused on energy consumption and reliable operation.

- **Modular architecture**

  Flexible, scalable configurations suitable for phased capacity development and project-specific requirements.

- **Integrated treatment**

  UF, RO and post-treatment technologies can be combined according to feedwater and product-water requirements.

Selected Desalination References

Examples from AQUAMATCH's documented project portfolio

Al-Dayer United • Basra, Iraq	UF + SWRO + Post Treatment	**72,000 m³/day**	2020
EREN Energy • Zonguldak, Türkiye	UF + SWRO + 2nd pass RO + EDI	**21,000 / 13,000 / 5,750 m³/day**	2010 / 2016 / 2024
UNICEF Project • Gaza Strip	MMF + SWRO + Post Treatment	**6,000 / 10,000 / 14,000 m³/day**	2018 / 2022
MAVEN • Indonesia	UF + SWRO	**21,600 m³/day**	2022

Documented references include turnkey and engineering/equipment-supply scopes across international markets.

Technology

AQUAMATCH provides the SWRO process, engineering and integrated treatment expertise.

Regional presence

HSRC brings established operations and offices in Colombia and Panama.

Project delivery

The combined platform supports engineering, procurement, installation, commissioning and long-term support.

Integrated Project Delivery Model

A clear path from concept to reliable operation

01

Project Development

Local market engagement & project structuring

02

Engineering

Process design, system configuration & technical documentation

03

Manufacturing

Equipment production and integrated system assembly

04

Installation & Commissioning

Site execution, testing, start-up & operator support

05

After-Sales

Long-term technical support and service

The objective: a dependable, scalable SWRO solution supported by international technology and regional execution capability.

WATER SOLUTIONS FOR A RESILIENT
